- Support Desk

SYSTEM REQUIREMENTS

- Perfex CRM version 2.3.x +
- CURL PHP Extension
- Mod_rewrite Apache

INSTALLATION

Login to Perfex as an Admin and go to SETUP>>MODULE.

And upload the **.ZIP** file downloaded from **codecanyon** and click **Install**

After the module has been successfully installed, click on **Activate** to activate the module.

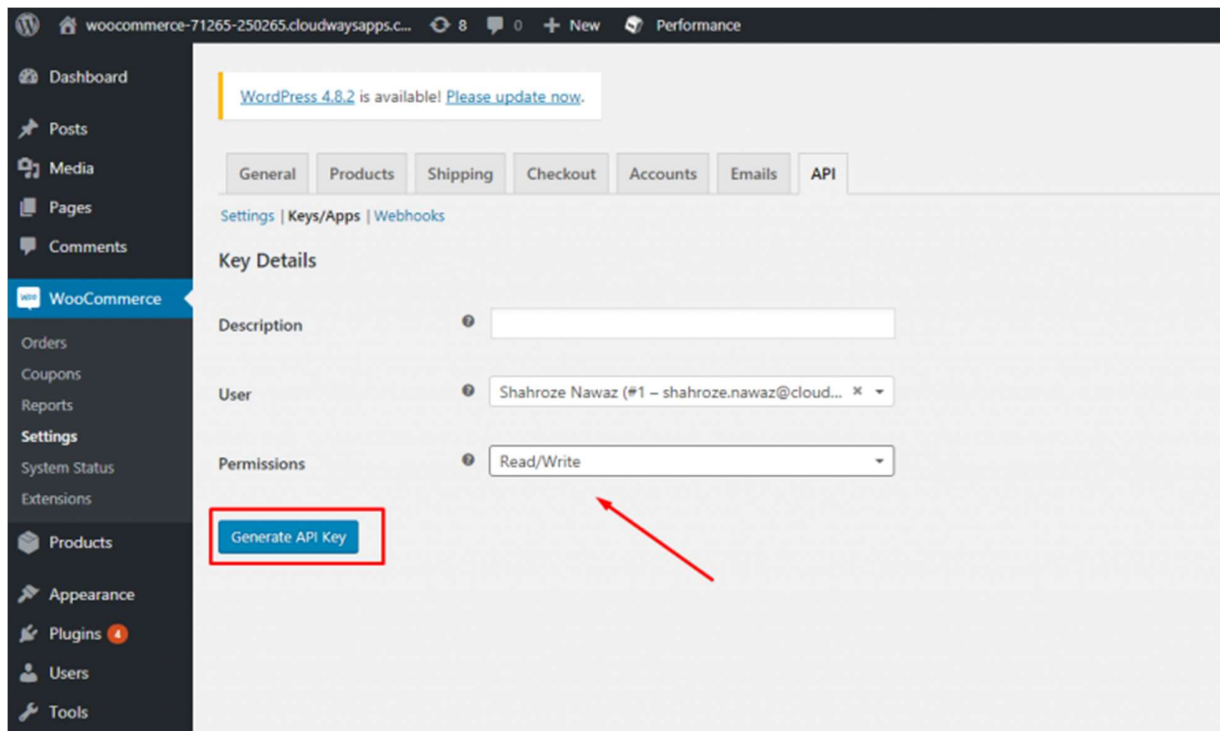

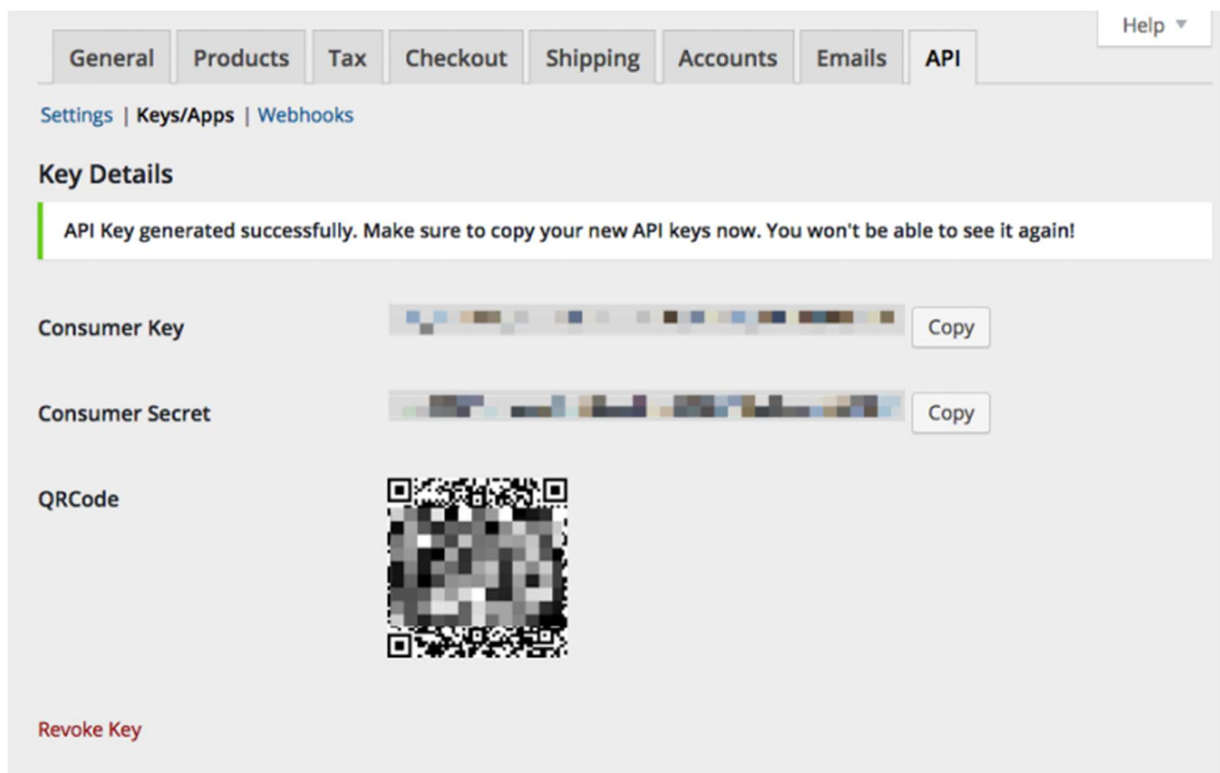

SETUP

Next, log in to the store's Admin Panel, go to the **WooCommerce→ Settings** and **enable REST API**.

Go to the **Key/Apps** tab and enter the Key Description, select the permission you want (for the purpose of this tutorial, select **Read/Write**).

Now click the **Generate API Key** button.

You will get the API Key, API Secret and QR code to scan,

UNINSTALLATION

To uninstall this module simply go to SETTINGS>>MODULES

And click DEACTIVATE

Lastly Click Uninstall.

FAQ

1. Do I need a WooCommerce Store to use this add-on
   ANSWER: Yes
2. Do I need perfex Crm to use it?
   Yes. **This is not a standalone module for PERFEX CRM, the module requires Perfex CRM application installed which can be purchased here**. Installation
3. How do I get support?
   Kindly contact us on Codecanyon or use our support form at https://www.boxvibe.com/support
   Or send a mail to support@boxvibe.com
   Thanks.

TROUBLESHOOTING

- To check what version you are using visit click here.
- If any **css/js errors** outputted on developers console or tables are not loading **make sure you cleared your browser cache.**
- **If you are using your own themes/view files** e.q my_home.php **make sure to re-check them** in case you are getting blank pages because may happen some function changes and an error occur in your view file. **Try switching to the original files** to check if everything will work.
- Getting 500 error - open support ticket and we will be happy to assist you.
